**FTS.31**  
ALUMINUM/WOOD CLAD  
THERMALLY BROKEN

## FEATURES AND BENEFITS

- Create an inviting flow between the inside and outside environments (in any weather condition).
- Choose from inswing or outswing doors in a variety of styles engineered for years of performance.
- Thermal breaks with thicker aluminum panels for superior performance.
- The thermally broken door system comes in both one and two door configurations.
- Suitable for the residential and commercial properties with high demands for energy conservation and high thermal insulation standards
- Our proprietary 6063-T6 aluminum extrusions are a prime example of why Panda systems are more durable and reliable than our competitors', even with everyday use.
- Multi-point locks and durable fabrication secure the door against forced entry.

**A**lso known as egress or terrace doors, French doors are a popular choice for entryways as well as patio and deck applications. In addition, our Dealer Select French Door Systems can be fabricated with both sidelites and transom windows, perfect for customizing your design.

## APPLICATIONS AND USES

Ubiquitous throughout modern homes, the French door has a chic, timeless style that brings an elegant touch to your project. The longevity of the system paired with its inherent ease-of-use makes the French Door System a popular choice for those looking for the perfect blend of style, substance, and value!

### FINISH:
