SUNROOMS

Quality is in the Details

The roofing and wall system of any Sunroom is indicative of the expected life of the product. We take that concept one step further believing that it is also indicative of how satisfied a customer will be over the life of the Sunroom.

WALL SYSTEM	SUNROOM
Thickness	3 1/2"
RadianceIQ™ Technology	Yes
Water Resistant	Yes
Warp & Crack Resistant	Yes

Heavy (.028) Aluminum Skin	Yes
Perform Guard Insect Treated	Yes
1.5 lb. EPS Density	Yes
Integrated Electrical	Available
Suitable for OSB / Shingle Applications	Yes
Fits Most Common Gutter Systems	Yes

Beautiful. Functional. Enjoyable

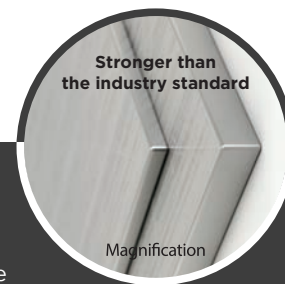

Integrated Electrical System

Each Myriad Sunroom offers homeowners a complete solution for their new living space. With our fully integrated electrical system, lighting and other electrical needs are met in a safe and effective way. Designed for a streamlined appearance, this system offers you the options you need without sacrificing style.

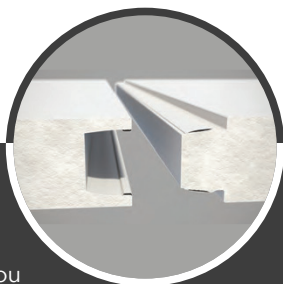

Exceptional Roof & Wall Panels

By design, the Myriad Enclosure roofing system is built to perform for the life of your home - exceeding the performance of other systems on the market. While the typical enclosure uses a .024 thick skin, Myriad uses a stronger more durable .028 inch thick system. That's 17% more than the industry standard.

High Performance Roof System

With our RadianceIQ™ system you get all the added benefits of a fully integrated system that forms the foundation for a high quality Sunroom experience - year over year. From skin to foam to lamination, the RadianceIQ™ system covers every aspect necessary for a high quality Sunroom constructed to withstand the test of time.

Insulated Walls & Roofing

In order to provide our customers with the very best in construction and insulation, our EPS is denser than what's typically available in similar products. The Myriad system is designed using high density EPS foam, 50% more per pound than the competition offers.

SUNROOMS

Window Systems

Our windows are custom made to fit your new sunroom to the exact specifications in order to deliver the look you want.

WINDOW FEATURES	SUNROOM
High Performance Vinyl Replacement Window	Yes

Cardinal 366 Low E/SuperSpacer	Yes
Custom Sizes	Yes
Maximum Window Width	60"
Maximum Window Height	84"
Glass Breakage Warranty	Available

Beautiful. Functional. Enjoyable

Super Spacer® See the difference.

Our spacer design offsets the effects of:

- Temperature Changes
- Heavy Winds
- Barometric Pressure Changes
- Glass Stress

Conventional Metal Spacer

Our Spacer

A Warmer Edge is Standard. Super Spacer® Really Delivers.

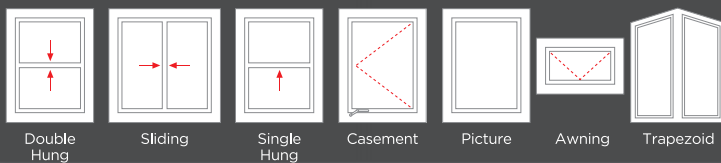

Since the majority of a window is glass, it is extremely important to select windows that have glass systems sophisticated in design, yet perform effortlessly when installed in the home. All of our windows come standard with Super Spacer® giving you a warmer temperature at the edge of the glass which reduces condensation.

Finally Glass that Works for You. Suntuive Self-Tinting Glass.

With our optional Suntuive self-tinting glass, you can manage your home's changing needs for passive solar heat gain, solar control and natural daylight transmittance. Enjoy more consistent, comfortable temperatures, reduced interior glare, more natural lighting and clear views of the outdoors every day of the year.

SCREEN ROOMS

Screen System Features

NatureVue's high definition technology gives you greater visibility through the screen, while being less visible when outside looking in. In fact, you only notice the screen as you get close to it - a feature designed to ensure that you won't walk into it but can still maintain picture perfect views.

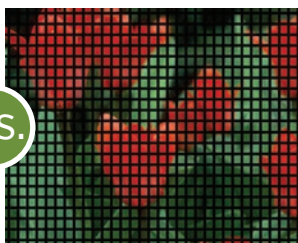

NatureVue™ Screens

NatureVue screens are made from permanent glass yarn which has been proven to withstand the elements and maintain its overall durability, color and beauty.

**NatureVue™
Screen**

VS.

**Standard Fiberglass
Screen**

See More. Get More.

While NatureVue is engineered to be undetectable from the center of a living room, it can be seen from a few feet away. This feature eliminates the risk of accidentally walking into the screen and makes NatureVue a perfect choice for your screen enclosure. The NatureVue benefits don't stop there. Not only is the NatureVue screen system flame retardant, but it allows for more airflow and protects against pests more than traditional fiberglass screens. When selecting NatureVue for your new enclosure, you'll enjoy all these benefits from the comfort of your new space.

NatureVue™ Benefits

- Excellent visibility from inside improves your view
- Improved light transmittance
- Better curb appeal when viewing the enclosure from the street
- Excellent insect protection due to 30% smaller openings than standard screens
- Improved airflow as a result of increased openness

SCREEN ROOMS

Entry Door Features

Your Myriad Enclosure includes a Legacy Storm Door as a part of the integrated enclosure system. Legacy Storm Doors provide you with the very best in entry doors for your new enclosure.

Legacy Door Features:

- Heavy 3 1/4" X 1 3/8" extruded aluminum main frame
- Powder coated finish for a beautiful, long lasting finish
- Five heavy duty hinges on standard sizes
- Fully weatherstripped for draft protection
- Tempered safety glass for added protection

PATIO COVERS

*Extruded Patio Cover
& Arbor System*

Beautiful. Functional. Enjoyable

Exceptional Roof & Wall Panels

While the typical enclosure uses a .024 thick skin, Myriad systems use a stronger more durable .028 inch thick system. That's 17% more than the industry standard.

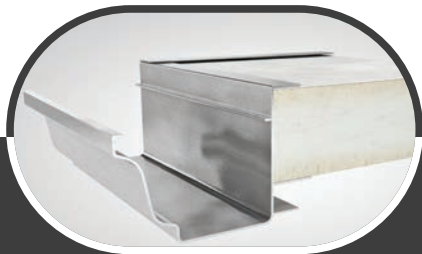

Insulated Walls & Roofing

The Myriad system boasts 1.5 lb per cubic foot in high density EPS foam, 50% more per pound than the competition offers. More insulation means superior performance and added structural integrity.

Extruded is Better

Our optional 5" Extruded Gutter System is designed for durability even during heavy rains and storms. It complements existing gutter styles and accepts most aftermarket gutter guards. Wider than the standard 4" gutter our system allows for better flow away from the home.

High Performance Roof System

From skin to foam to lamination, the RadianceIQ™ system covers every aspect necessary for a high quality Cover constructed to withstand the test of time

Integrated Electrical System

With our fully integrated electrical system for the roof, lighting and other electrical needs are met in a safe and effective way. Designed for a streamlined appearance, this system offers you the options you need without sacrificing style.

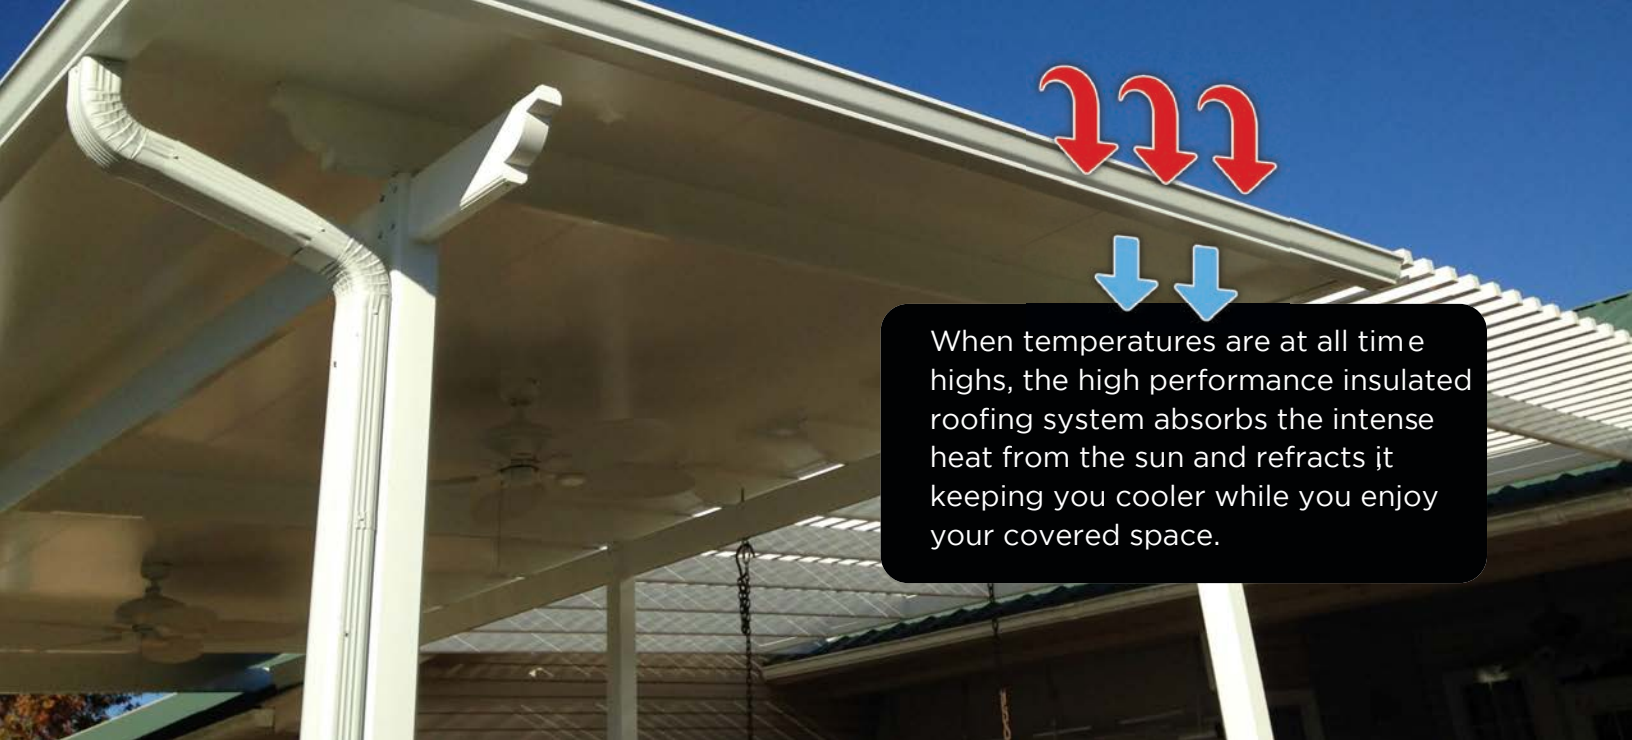

PATIO COVERS

Patio Cover Features

When temperatures are at all time highs, the high performance insulated roofing system absorbs the intense heat from the sun and refracts it, keeping you cooler while you enjoy your covered space.

Beautiful. Functional. Enjoyable
