

CLEAN LINES. MODERN STYLE.

Open your living space to the outdoors.

Expand your view and bring the outdoors in with Heritage® windows and doors. Built with aluminum, their narrow profiles, expansive glass and variety of options and configurations deliver exceptional value for your custom home.

Built in the Southwest region, with a history of leading the way in innovations in design and manufacturing, Heritage products are resistant to the desert's natural forces and ideal for both new construction and replacement.

For more information or find a local authorized Andersen dealer, visit heritagewindows.com.

Design Versatility.

Embrace an indoor-outdoor lifestyle with floor-to-ceiling window walls or sliding doors in dark colors or a clear anodized finish for modern styling. Choose laminated glass for added security or tinted glass for privacy and design enhancements. Extruded aluminum's strength and versatility yields beautiful, custom-made designs for virtually any combination of shapes and styles.

Extreme Durability.

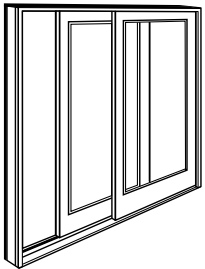

Durable extruded aluminum construction withstands extreme elements while enabling made-to-order design solutions for most combinations and styles your project may require.

Multi-Slide door in dark bronze finish.

PRODUCT OVERVIEW

DOORS

MULTI-SLIDE & SLIDING PATIO DOORS

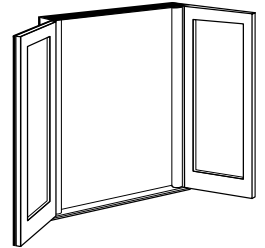

Sliding patio doors fit into tighter spaces than hinged doors because their panels don't interfere with your room or patio. Multi-Slide doors have two or more movable panels that slide and stack behind a stationary panel or pocket into the wall for a wide open view. Sliding patio doors feature one moveable panel and one stationary panel.

PIVOT DOORS

Pivot doors rotate on a pivot box without the use of hinges. Their flexible design allows them to open in, out or both depending on the space.

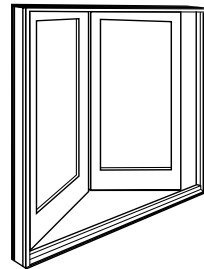

HINGED PATIO DOORS

Hinged patio doors are available as an inswing door for smaller exterior areas or outswing patio doors for more space inside your home.

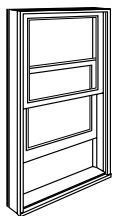

FOLDING DOORS

Folding doors stack perpendicular to the wall and virtually out of sight. To optimize space, they're designed to fold from the left, right or bi-parting from the center.

WINDOWS

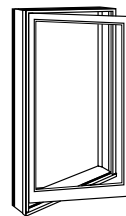

SINGLE-HUNG & SLIDING WINDOWS

Single-hung windows have one operating sash (glass panel) that moves up and down, allowing for ventilation at the bottom of the window. For added architectural style, an arch top single-hung is also available.

Sliding windows operate in a horizontal fashion to allow for full top to bottom ventilation. They're available in a two- or three-panel configurations where the center sash (glass panel) is fixed.

WINDOW WALLS

Heritage® window walls are a combination of stationary (non-operating) windows that create a stunning wall of light and maximize your view. Operable inserts can also be used within the window wall to provide ventilation.

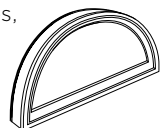

CASEMENT & AWNING WINDOWS

Casement windows are hinged on the side and open outward to the left or right allowing for full top to bottom ventilation. Awning windows are hinged on the top and open outward from the bottom, allowing for ventilation and protection from the rain.

SPECIALTY WINDOWS

Specialty windows are stationary (non-operating) windows characterized by their special shapes, including curves and dramatic angles. They can make a signature statement in your home or provide a delicate lighting accent.

Specialty (picture) window in clear anodized finish.

Unequal, bi-parting, folding door in clear anodized finish.

Window wall with casement inserts and hinged patio door in clear anodized finish.

Folding door in anodized dark bronze finish.

Permanently applied grilles on the interior and exterior of your window with a spacer between the glass.

Choose from a contoured or contemporary profile.

Contoured

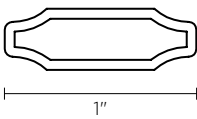

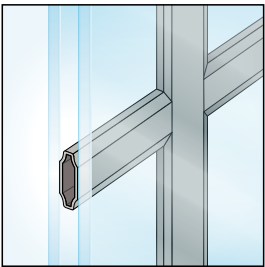

Contemporary

FINELIGHT™ GRILLES-BETWEEN-THE-GLASS

Aluminum grilles conveniently placed between the glass making cleaning the glass easy inside and out.

Available in a contoured profile only.

Contoured

GLASS OPTIONS

ENERGY PERFORMANCE DETAILS

SMARTSUN™ (366)

Thermal control similar to tinted glass, but with the visible light transmittance similar to Low-E glass.

LOW-E WITH HEATLOCK® COATING (i89)

Applied to the room-side surface, it reflects heat back into the home and improves U-Factors.

LOW-E (272)

Outstanding overall performance for climates where both heating and cooling costs are a concern.

CLEAR DUAL-PANE

High visibility with basic thermal performance.

ADDITIONAL GLASS OPTIONS

TEMPERED SAFETY GLASS standard on doors.

LAMINATED GLASS for added strength, enhanced security and sound control.

MONOLITHIC GLASS is reinforced with a plastic laminate between the two panes to resist impact. Choose from bronze or gray.

PATTERNED GLASS to let in light while obscuring vision (pattern shown below).

Obscure

Other glass types are available. Contact your Andersen supplier.

SLIDING WINDOW LOCK

SINGLE-HUNG WINDOW LOCK

Hinged outswing patio door in clear anodized finish.

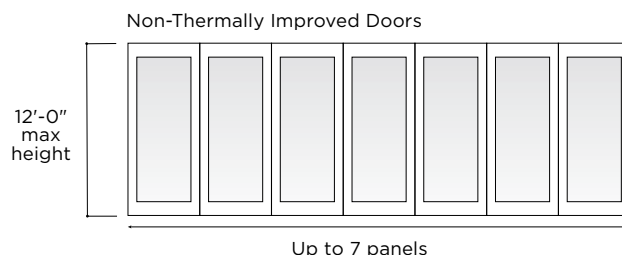

Welcome the outdoors in with sliding doors that give you the flexibility of moving glass panels in various sized openings for an uninterrupted view. For larger openings, choose a Multi-Slide door that can feature up to seven glass panels and for more traditional openings, choose a sliding patio door that features one or two sliding glass panels.

KEY FEATURES

- ## MULTI-SLIDE DOOR ADDITIONAL FEATURES

SIZING & CONFIGURATIONS

- Stacking and pocketing configurations available in one-directional and bi-parting option
- Maximum panel size is 60 sq. ft. for both thermally and non-thermally improved doors
- Door panels feature 2 $\frac{5}{8}$ " wide stiles and bi-parting lock stiles feature a 5 $\frac{1}{16}$ " overall width
- Inward and outward corner doors available

SILL OPTIONS

- Three sill options available to address specific performance” and design criteria for most any application
- Standard drainage sill stops bugs and air infiltration with self-closing weep holes and collects water underneath the visible sill surface, draining to the exterior to prevent water infiltration

Drainage Sill
(standard)

Low-Profile Sill

Tile Track Sill

	DRAINAGE SILL	LOW-PROFILE SILL	TILE TRACK SILL
Sill Height	1 $\frac{1}{16}$ "	9 $\frac{1}{16}$ "	Flush
Bottom Rail Height	7 $\frac{1}{16}$ "	5 $\frac{7}{8}$ "	5 $\frac{13}{16}$ "

*Available in 2XP, 2X0, P4XP, 04X0 configurations. Custom configurations are available, see your Andersen supplier for details. **Not rated.

Folding doors and window wall combination in dark bronze anodized finish.

HINGED & PIVOT DOORS

Make a dramatic statement with hinged or pivot doors that add a stylish transition between indoors and out and feature large glass panels that frame beautiful views. For larger openings, choose a folding door where the glass panels stack virtually out of sight when open or a pivot door that features a hingeless design for ease of operation and adds a bold design statement to any home. For more traditional-sized openings, hinged patio doors are also available in a variety of configurations.

FOLDING DOOR

KEY FEATURES

- Doors can be built to open from the right, left or center for easy, everyday use
- Top-hung panels allow for smooth operation
- Multi-point locking system secures the door firmly and offers enhanced security
- Built-in adjustment capabilities allow for easy installation and adjustments throughout the life of the door*
- Outswing configuration gives you more space inside your home
- Non-thermally broken panels standard
- Fits openings up to 22' wide and 9' tall with a maximum panel width of 36"

HINGED PATIO DOOR

KEY FEATURES

- Choose a single panel for a more traditional look or multiple panels to maximize your opening
- Inswing and outswing configurations available hinged right or left
- Unique hinges allow for a frictionless, quiet close every time
- Single-point or multi-point locking system available
- Sill options include a standard sill that drains water away or a ramped sill**
- Optional transoms and sidelights enhance light and view

PIVOT DOOR

KEY FEATURES

- Pivot hardware eliminates side hinges and allows the door to rotate on an engineered pivot
- Inswing and outswing configurations available with a single panel that pivots right or left
- Optional self-closing hardware allows the door to shut automatically and quietly close
- Door panel locks in place when pushed open
- Non-thermally broken panel standard
- Sill options include a modified sill with either a ½" or ¾" height or a ramped sill**
- Fits openings up to 12' tall and 5' wide

WINDOWS

Choose from traditional style casement, awning, single-hung or sliding windows or make a statement with unique window walls that offer a contemporary design and expansive views.

WINDOW WALLS

KEY FEATURES

- An affordable alternative to residential and commercial storefront systems
- Feature one perimeter frame to keep lines to a minimum while building in multiple lights of glass
- No need for joining with a unique insert capability that allows sliding and hinged windows to be placed inside the frame
- Thermally broken and non-thermally broken options available
- Built-in weep system used to help manage water
- Flat sub-sill available for windows to sit on the floor
- Available in 4½" frame depth for a seamless integration with hinged and sliding patio doors
- Optional 6" mullion used for larger openings the require reinforcement
- Fits openings 12' tall and 21' wide

CASEMENT & AWNING WINDOW

KEY FEATURES

- Unique hinges allow casement sash to open to 95° for maximum ventilation
- Multi-point lock on the perimeter of the frame offers enhanced security
- Integral nail fin is available in 1" or 1¼" widths
- 3⅝" equal frame sightlines for a modern look with a 2⅝" frame depth
- Insect screens blend into the frame and out of sight
- Casement windows fit openings up to 7' tall and 5' wide
- Awning windows are traditionally wider than they are tall and can fit openings up to 5' tall and 5' wide

SINGLE-HUNG & SLIDING WINDOW

KEY FEATURES

- 2½" sightlines offer more glass and a modern look
- Sliding windows have self-closing weep holes in the sill to help manage water, air and bugs
- Single-hung windows have built-in weep hopes for water management and dual weatherstrips for a barrier against the elements
- Single-hung balancers allow for easy sash opening and closing and holds the window open at any position
- Extruded aluminum insect screens are color matched to the frame of the window
- Sliding windows fit openings up to 5' tall and 8' wide
- Single-hung windows fit openings up to 8' tall and 5' wide
